Pharmacy Clinical Prior Authorizations

HHSC bases clinical prior authorizations on evidence-based clinical criteria and nationally recognized peer-reviewed information. The prior authorization may apply to an individual drug or a drug class on the formulary, including some preferred and non-preferred drugs. Clinical prior authorizations approved by the Texas Drug Utilization Review Board are available for use by the Vendor Drug Program for traditional Medicaid and managed care organizations (MCO). There are specific clinical prior authorizations all MCOs are required to perform. Usage of all other clinical prior authorizations will vary between MCOs.

Obtaining Prior Authorization for Medicaid Managed Care

Prescribing providers or their representatives must contact the MCO. The **Prescriber MCO Assistance Chart** identifies the prior authorization and member call center phone numbers for each MCO.

About the Assistance Chart

Each prior authorization guide includes a description of the prior authorization evaluation process steps. All steps apply to traditional Medicaid claims. This assistance chart identifies which MCO utilizes prior authorizations and how those prior authorizations relate to those used by VDP.

May 2021 Revisions

- New clinical prior authorizations approved for:
 - ▶ Amantadine Extended-Release Agents (Gocovri ER and Osmolex ER)
 - ▶ Dopamine Agonists (Apokyn and Kynmobi)
 - ▶ Evrysdi
 - ▶ Hemady
